Slide:02

Here are some key features you can consider including in your ping pong game project:

Single Player Mode: Allow players to practice against a computer-controlled opponent with adjustable difficulty levels.

Multiplayer Mode: Enable players to compete against each other locally or online, either through split-screen or network play.

Game Modes: Offer different game modes such as:

Standard Match: Traditional ping pong rules with a set number of points or time limit.

Customization Options: Let players customize their paddle appearance, ball color, and other visual elements to personalize their experience.

Responsive Controls: Ensure smooth and responsive controls that accurately reflect player input, allowing for precise shots and movements.

Score Tracking: Keep track of players' scores, wins, losses, and other statistics to provide feedback on performance and progress.

Pause and Resume: Allow players to pause the game at any time and resume later, with the option to save progress.Also there are sound effects.
